MAYOR RICHARD GREEN

**INAUGURAL ADDRESS
MAYOR RICHARD GREEN
JANUARY 2, 1980**

As I took the oath of office today and prepared to assume the responsibilities of the office of Mayor of the City of Rochester, I could not help but reflect that the path to this podium tonight has been a long one. Almost a year ago I made my decision to become a candidate for Mayor of Rochester, but, in a very real sense, the journey began nearly a decade ago when I first decided to run for the Rochester City Council. While many pages in the history of the City of Rochester have been written since I first assumed a seat on the City Council in 1972, the problems that existed then, in large part, still exist. Thus, today Rochester finds itself beset by a multitude of problems, each of which demands attention if Rochester and its citizens are to progress and prosper. It is to the solution of these problems that this administration will dedicate itself.

Throughout the campaign I indicated a number of areas in which I believe action is required in order for the City of Rochester to adequately meet the needs of its citizens. Foremost among these is the area of open government. Fortunately, as I indicated during the campaign, this is the one area in which dramatic changes can and will be effected immediately and without cost to the Rochester taxpayers. During my administration the business of the City will be conducted openly so that you will be able to see how decisions affecting the city are made, and you can determine whether your tax dollars are being spent wisely. Beyond opening up the process of government, in the next two years I pledge to begin the difficult task of dealing with our long-standing sewerage and water problems; of re-establishing a varied and active recreation program; of implementing a program of responsible planning for the future harmonious growth of Rochester; of improving the equipment of and morale within our Police and other City departments; and, most importantly, of bringing order and sound business management to our City and School Department financing.

Solving these problems will not be easy. We must not delude ourselves into the belief that they can be remedied within the next two years, but I promise you that under my administration these problems will not be ignored!

In an effort to streamline the Council and to better prepare it to

deal with the problems facing us, I have restructured the Council's committee system. Under my administration, there will be only five standing committees of the Council. They are Public Health and Safety, Management, Public Works and Facilities, Human Services, and Finance. In addition, because of the special problems facing us in industrial development and downtown revitalization, I propose the creation of two temporary special Council committees that will deal exclusively in those areas. I further propose to increase the involvement of private citizens in city government by appointing citizen's task forces that will examine the questions of senior citizen services, special youth services, industrial development, downtown revitalization, updating city ordinances, and charter revision.

These citizen task forces will work in conjunction with the Mayor and City Council to explore the options available to us in our quest for an improved quality of life for all Rochester's citizens. The problems facing us are big ones, and we must marshal all our resources if we are to deal with them effectively and realistically. By actively involving our elected officials and utilizing the presently untapped resource of our private citizens in the development of programs to combat our various problems, I am confident that we can make substantial progress towards finding solutions which are both practical and consistent with the City's ability to pay.

Considering the magnitude of the problems facing us, this administration must, of necessity, be characterized by cooperation and hard work. Only with cooperation between the Mayor and Council can we have the time that the solution of our problems will demand. If we descend into petty political wrangling, we will sap our limited energies and resources fruitlessly, and the citizens of Rochester will be the losers. I therefore invite each member of the Council to join with me in a pledge to work for the good of the City regardless of political affiliation or personal interests. With cooperation, there is no goal which we cannot achieve; without it, we can accomplish nothing.

While my administration will not seek confrontation, we will not hesitate to deal with controversial issues. What is best for the City of Rochester will be our guidepost, not political expediency or the needs of special interest groups. If the best interests of Rochester require that I take unpopular positions, I am prepared to take them and let the voters be my judge.

For too long Rochester has stood at a crossroads in its history, unsure of which road to take. The time has come to choose a path, and with God's blessing it will be the right one. The journey into the eighties will be a long and sometimes a painful one, but the time has come to begin. Working together we will not lose our way.

RICHARD GREEN
Mayor

CITY GOVERNMENT
As Organized January 1, 1980
MAYOR RICHARD GREEN

COUNCILMEN

Ward One—Paula Morin, James McManus, Jr.
Ward Two—William Fielding, James Burchell
Ward Three—Josephat Laurion, Henry Paradis

RESOLUTION COMMENDING ROCHESTER BABE RUTH LEAGUE

WHEREAS: The Rochester Babe Ruth Baseball League, 13 year old All Star Team has won the District, the State, and the New England Championships.

AND

WHEREAS: This is the first Rochester Youth Athletic Team ever to win a New England Championship.

AND

WHEREAS: The Rochester 13 to 15 year old Babe Ruth All Star Team has won the District and the State Championships.

AND

WHEREAS: The Rochester Babe Ruth League teaches the fundamentals of baseball, good sportsmanship, and competition to the City's Youth, and includes approximately 130 youngsters, their coaches, Manager, and Board of Directors.

AND

WHEREAS: This training helps to build good character and good citizens from among our young people.

NOW THEREFORE BE IT RESOLVED:

THAT the Rochester City Council commends these two teams in particular and the Rochester Babe Ruth League in general for the work that they are doing in building moral character in our youth, and for the recognition that they have brought to our City by their efforts.

Passed September 4, 1979

RESOLUTION FOR AMOUNT TO BE RAISED BY PROPERTY TAXES

BE IT RESOLVED BY THE MAYOR AND CITY COUNCIL OF THE CITY OF ROCHESTER:

THAT whereas the income items of the 1979 budget have gone through several changes due to increases in the State allotments and some decreases in the City estimates,

THEREFORE, the total budget approved of \$8,213,241 less income of \$2,695,338.75 will cause the amount to be raised by property taxes to be \$5,517,882.25.

Respectfully submitted,
 ERNEST J. LEVESQUE
 Clerk

This is to certify that I have examined the accounts for Ernest J. Levesque, Clerk of the Rochester District Court for the year ending December 31, 1979, and I find them as set forth in the above statement with all payments to the Treasurer and otherwise properly receipted for together with a balance in the "Regular account" of \$50.00 in cash and "checking account" balance of \$182.24. For the "special account" there is a checking account balance of \$11,205.85. This "special account" consists of bail money and similar escrow accounts.

Respectfully submitted,
 RICHARD F. COOPER
 Justice

ROCHESTER FIRE DEPARTMENT ANNUAL REPORT FOR 1979

TO THE HONORABLE MAYOR AND MEMBERS OF THE CITY
COUNCIL OF THE CITY OF ROCHESTER, NEW HAMPSHIRE:

Gentlemen: I herewith submit the Annual Report for the year
ending on December 31, 1979.

There were a total of 754 alarms in the City of Rochester in
1979, which consists of the following: Box Alarms 62, Still Alarms
591, East Rochester Alarms 36, Gonic Alarms 65.

These include: motor vehicle fires 41, accident responses 37,
chimney fires 40, electrical fires and hazards 66, industrial fires
12, mercantile fires 23, residential fires 43, woodstove fires 19,
fireplace fires 2, gas washdowns 47, Code 25's 20, honest
mistakes (false alarms) 45, malicious false alarms 42, mutual aid
responses 6, mutual aid calls 8, brush and grass fires 48, brush
and grass fires burning without a permit 10, bomb threats 16,
hurst tool responses 17, miscellaneous calls 212.

Below are the figures reported on Buildings and Contents in-
volved in fires for 1979:

Estimated Value of Buildings	\$1,078,489.00
Estimated Insurance on Same	915,200.00
Estimated Loss Reported	115,843.68
Insurance Paid on Same	39,913.68
Estimated Value of Contents	308,635.00
Estimated Insurance on Same	296,100.00
Estimated Loss on Same Reported	51,871.25
Insurance Paid on Same	42,275.59

At this time, I wish to express my appreciation to his Honor,
the Mayor, and members of the City Council, the Committee of
the Fire Department, the Board of Engineers, all members of the
Rochester Fire Department, and to all other persons who have
rendered us assistance throughout the year of 1979.

Respectfully submitted,
ROBERT E. DUCHESNEAU
Fire Chief

**REPORT OF THE LIBRARIAN
of the
ROCHESTER PUBLIC LIBRARY
for 1979**

TO THE HONORABLE MAYOR, CITY COUNCIL AND BOARD OF
TRUSTEES OF THE ROCHESTER PUBLIC LIBRARY:

The public library is frequently acclaimed as America's greatest bargain. Because it strives to reach the goal of service to people of all ages and all walks of life with intellectual and cultural advantages, with recreational and educational resources, the library, in most instances, provides great value and a high return on investment.

The Rochester Public Library shares this common goal of valuable service. In 1979 for example over a thousand books and other materials were taken to shut-ins, nursing homes, and other institutions as part of the Outreach Program. Meeting rooms were made available for non profit groups to gather and for library-sponsored programming, providing over twenty-three hundred people with meeting places.

Programs were offered to adults on crafts, hobbies, investments, physical fitness, and energy. For children similar kinds of opportunities were available. A selected group of preschool children participating in the second annual RIF (Reading Is Fundamental) program received books for personal ownership and were introduced to the library and a life of reading.

Basic library services of loaning books, periodicals, art prints, recordings, and films continued, and a primary objective of serving as a center for information became increasingly patronized. Over a thousand questions were counted as being responded to, and in addition many uncounted queries were absorbed into a day's activities.

Sincere appreciation is extended to the fine library staff, the trustees, the mayor and city council. The consistent support of these people, the Friends of the Library, the local media, and the many patrons who contribute so much more than checking out a book to the spirit of the library, is the basis of the bargain we hope to provide.

Respectfully submitted,
MRS. ROBERTA RYAN
Librarian

ROCHESTER POLICE DEPARTMENT **ANNUAL REPORT FOR 1979**

TO THE HONORABLE MAYOR AND CITY COUNCIL OF THE
CITY OF ROCHESTER:

The following is an accounting of the activities of the
Rochester Police Department for the Year 1978:

MOTOR VEHICLE ARRESTS

Allow unlicensed person to operate	7
Allow taxi to be operated without a medallion	1
Allow unregistered vehicle to be operated	10
Allow taxi to be operated without schedule of rates	1
Allow vehicle to operate without diesel permit	1
Allow uninspected vehicle to be operated	14
Allow a minor to operate an OHRV	1
Blocking driveway	1
Bench Warrant	17
Cross center median strip	4
DWI	131
Disobey a police officer	1
Display emergency lights	1
Evading toll fare	5
Following too closely	7
Fail to have flag on projected load	5
Fail to stop for a police officer	15
Fail to keep right	20
Fail to yield right of way	32
Fail to report accident	1
Fail to signal	2
Fail to stop at railroad crossing	6
Fail to appear when summonsed	1
Fail to display plates	1
Fail to file trapping report	1
Fail to stop for pedestrian	1
Forged inspection sticker	1
Give false information to a police officer	2
Held for other departments	4
Improper passing on right	49
Improper operation	4

Leave scene of an accident	18
Littering	5
Load spillage	3
Make improper turn	1
Misuse of plates	25
Misuse of power	54
Operate OHRV on a public highway	6
Operate taxi without a license	8
Operate with an altered exhaust	3
Operate without a muffler	5
Operate boat without a fire extinguisher	1
Operate boat without lights	1
Operate boat too close to shore	3
Operate with obstructed mechanism	1
Operate motorcycle without goggles	19
Operate motorcycle without a helmet	3
Operate motorcycle without mirrors	1
Operate without a license	107
Operate without corrective lenses	12
Operate without highway permit	14
Operate without brakes	3
Operate without financial responsibility	19
Operate without lights	7
Operate after revocation	25
Operate after suspension	19
Operate unregistered vehicle	125
Operate uninspected vehicle	557
Operate to endanger	1
Operate with smooth tires	43
Operate with obstructed windshield	2
Operate wrong way on 1-way street	2
Operate overweight or overwidth vehicle	18

REPORT OF THE DEPARTMENT OF PUBLIC WORKS

TO THE HONORABLE MAYOR AND MEMBERS OF THE CITY COUNCIL:

I submit herewith my report of the activities of the Department of Public Works for the year ending December 31, 1979.

Snow removal, salting and sanding required most of our attention for the first 4 months. However, we did considerable patching to roads and streets when the weather permitted.

Toward the middle of April we started our street sweeping and continued this until the middle of November when cold weather set in.

Minor repairs were made to bridges and culverts, due to weathering, on England Road, Flat Rock Bridge Rd., Winter Street, Little Falls Bridge Rd., Chesley Hill Rd., Salmon Falls Rd., Lowell Street, Whitehall Road, and the Dewey Street Foot Bridge.

Our surface drains and catch basins were cleaned in the spring and fall with the aid of our Hydraulic Catch Basin Cleaning Machine. Plugged drains which would not take water were rodded out.

Gravel was hauled to roads and streets that were washed out so as to improve their unpaved areas, such as: Sheepboro Road, the Dump Road, Evans Road, Hussey Road, Rickford Road, Havenhill Road, Chicken Farm Road, and to many other streets for road shoulder repairs.

We hot-topped some streets and roads in the city during the summer months, such as: Franklin Street from corner of Chamberlain St. to Portland St., Louise Street, Portland Street from Columbus Ave. to Salmon Falls Rd., Main Street - East Rochester, Brook Street, Dustin Terrace, Summer Street from Columbus Ave. to Eastern Ave., Kimball Street, Westview Street, Hillside Drive, Liberty Street, Rochester Neck Road to England Road, Small Street, Winter Street, Part of Columbus Avenue off South Main St., Part of Lowell Street off Hancock St., and Salmon Falls Road from Route 202 to Route 16.

Dust oil was applied to control dust on some of the gravel roads in the city such as: Sheepboro Road, Dump Road, Evans Road, Bickford Road, Hussey Road, Havenhill Road, and the Chicken Farm Road.

Water Mains were completed on Maplewood Avenue, and Tingley Street, using 288 feet of 6'' Ductile Iron Water Pipe.

Forty-nine new water services were installed and fifteen water services were relaid in the City.

Sewer Mains were completed on Maplewood Avenue, using 117 feet of 6'' Transite Sewer Pipe.

Thirty-four new sewer services were installed bringing the total to 3,675 services in the system.

Two new pieces of equipment were purchased during the year to aid the city with its work. We purchased a new Stedt Hydraulic Catchbasin Cleaning Machine, and a new Sreco Sanitary Sewer Rodding Machine.

Water samples are taken once a week and taken to the Portsmouth Water Laboratory for testing.

I take this opportunity to express my appreciation to The Mayor, members of the Public Works Committee and City Council, and the employees of the Public Works Department for their assistance in achieving our daily tasks.

Respectfully submitted,
PAUL W. CLEMENT
Acting Commissioner
Public Works Department

REPORT OF THE SUPERINTENDENT OF SCHOOLS 1979

TO THE SCHOOL BOARD AND CITIZENS OF ROCHESTER:

The year 1979 was busy and productive and filled with many activities that continue to maintain the quality of education and, in some instances, to improve it. The variety and multitude of things undertaken and accomplished during the year may best be illustrated by taking excerpts from my monthly reports to the Board of Education. They are as follows and will be listed by month.

January

The Section 504 requirements of Public Law 93-112 are complete and, now that they are accepted, they will be sent to the Boston office. This is in regard to discrimination against handicapped people. Not every one of our buildings is in strict compliance with the building requirements of Section 504; however, with a multiplicity of buildings we are able to take care of any handicap situation that occurs. I would assume that this would conform to the building requirements as specified in the law.

Public Law 874 relates to parents who work on government property or for the government, and it is called the Impacted Aid Law. This last year we have received \$30,886.56; therefore, it is worth the lengthy process to complete the requirements and make out the report.

The month of January will be filled with curriculum activities. The Accountability Committee will continue to meet to develop guidelines. Individual buildings and levels will continue to meet on Wednesday afternoons to develop and refine curriculum plans. There are eight workshops being put on this month for classroom teachers to improve their ability in the classroom. Some of these are a Nutrition Workshop, a Movement Education Program, and New Hampshire History in Social Studies.

February

I have had two meetings during this month as a member of the Executive Committee of the Strafford Learning Center to make plans for the coming year. Each year we buy services from them

and make a small contribution. This year we have a full-time psychologist, two learning disability aides, and the consultant services of an occupational therapist and speech pathologist. Next year, if additional state and federal monies come, we will need to expand these services to help in the area of handicapped education.

This time of the year is the time when we consider seriously who I shall recommend to the Board for rehiring who are not yet on continuing contracts. I, therefore, have made a special effort to get into the classrooms of those teachers not on continuing contract so that, when I talk with the principals and/or the staff member, I can do so intelligently. Next month I shall be recommending to the Personnel Committee those people I feel eligible for rehiring.

March

I have met with state and city officials on the development of an economic education program. We have found, not only locally but nationally, that not much is known about how our economic system works, nor is there a basic understanding of our economic process. Our first step is to take a survey to see exactly where we stand before we determine what, if any, moves we will be making.

Mr. Drago's resignation and Dr. VanZandt's leaving as Director of Guidance has created substantial problems at the High School. I have asked Deputy Principal Lausier to assume the leadership responsibility for the balance of the year so that we can recruit and present some viable candidates to replace Mr. Drago.

We are in the process of preparing a master schedule of course selections at the High School and Junior High for the next school year, 1979-80. When this is complete we will then select and set aside time when each class will be able to choose their courses according to their own needs and plans. We will do this by the Arena Scheduling technique as we did last year because it worked effectively.

April

I met for two days with other superintendents of Strafford County developing long-range plans for the Strafford Learning Center and to review what we are doing now and make changes. With the greater number of handicapped children now being

identified, I believe we will find in the future more reliance on Strafford Learning Center to provide the specialized type of education that is too expensive to provide by the individual districts, and yet less expensive than sending the children to a residential setting. At the present time, there are two classes in Rochester sponsored by the Strafford Learning Center. These are called transitional adjustment classes for those children too disturbed to handle a normal classroom routine. Also, the Strafford Learning Center offers a class for preschool handicapped children, age 3-6, in Somersworth that we are also responsible for. In the plans for the future, it would look as if we would need classes for the severely learning disabled and the autistic also.

The secondary administrators, Mr. Gilman, and I have been studying the overall administrative organization at the secondary level in an attempt to provide financial savings as well as streamline the operation.

May

The Accountability Committee has continued to meet to establish a local plan. Three teachers and I attended a statewide assessment meeting sponsored by the Commissioner of Education. We are progressing satisfactorily and, at this time, there does not seem to be any problems. Along with this each year I require my administrators to establish objectives at the beginning of the year. Near the close of each year I require them to submit a report on whether or not they accomplished these objectives.

We are fortunate to be hosting the New England Regional Reading Association meeting on May 16. As you recall, we were a Right to Read site and were the first district in the state to reach its reading goals. With our emphasis still on reading, we are enthusiastic about this upcoming meeting.

The scheduling at the Junior High School is now complete. At the moment we are calling it a tentative schedule because of some unknowns that relate to the High School. When the High School schedule is complete, we will be checking both of them to see what conflicts there are, if any, and to correct them.

I have set up interviews for the selection of a new High School principal. My goal is to complete this task before the end of the month and make a recommendation to the Board so that the new person can be on board in early July.

June

The month of June ends our 1978-79 school year. Graduation this year will be in the new gymnasium on the evening of the 18th. Awards night will be held on June 13.

I participated in the Adult Evening School graduation. We had thirty adults receive their diplomas and some of these people had worked several years to achieve this distinction. Our adult evening program provides an excellent opportunity to offer an educational program for those who were not fortunate enough to finish earlier.

The State Department of Education this month conducted workshops on a new accounting system that they are requiring all districts to adopt by 1980. This is a double-entry system and follows very closely the federal accounting program. During the ensuing months, by the next budget year we will be developing our own local budget along these new guidelines.

September

School opened without any major problems this year. We had fewer bus problems than anticipated although a few were overloaded. The classrooms need some adjustments to balance out the size but, at the present time, there does not seem to be a problem there either. An accurate count as to numbers will not be available until the end of September, but it looks now as if our enrollment will remain within one hundred of what it was last year.

Inflation is causing a considerable problem this year. Not only has the cost of energy such as gasoline gone up, but the cost of heating oil and electricity far surpasses any prediction that I might have considered. Added to that the increased cost of paper, textbooks, replacement equipment, repairs, and labor will cause our budget to go askew in spite of attempts to keep it in some semblance of reasonableness.

October

Our schools are now running smoothly after the initial opening problems were resolved. Mr. Gilman has ridden most of the buses and taken care of overloads for the present time. We do have one bus that is at capacity that could cause us a problem in the future, but presently we will hold on taking any action.

All classrooms are functioning as they should. The new teachers that we have selected are working hard and all schools

are well into the educational process. It gives a person a good feeling to go from school to school and classroom to classroom and see a lot happening with the learning process.

Our October 1 enrollment is slightly less than our October 1 enrollment was a year ago, but it is not a significant amount and does not change the overall picture in any way.

On October 19 we will be running a workshop on assessment and accountability for all teachers. For that reason schools will be closed on that day. We will have the Commissioner of Education and four chiefs of the various departments from the State Department of Education present to conduct this workshop. I am requiring all staff members to participate. In line with this workshop the Accountability Chairman has been meeting this fall to continue to develop our own local accountability process. These meetings will tie in with the workshop and the workshop will provide stimulus as well as information to the committee on the process of establishing a system-wide accountability program.

November

On October 19 our meeting on accountability was held in the Rochester Schools. This was conducted by four state officials from the State Department of Education who introduced accountability and discussed ways in which school systems could become more accountable. After their presentation teachers and administrators broke up into smaller groups to study ways in which accountability would affect their particular discipline or level. The representatives from the state did an excellent job in presenting the problem and the teachers were serious and thoughtful in planning the techniques and ways our system can develop an accountability process.

This month all of the administrators and others affected by the new State and Federal law on Unemployment Compensation met in the Council Chambers with other department personnel from the city to discuss the implementation of Unemployment Compensation Insurance and to discuss how to set up workable procedures.

Energy is in the forefront of everyone's mind. I, therefore, sent Mr. Leon Hayes to a conference on energy in Concord to help us become better informed on techniques of energy conservation. In addition to this, Mr. Gilman has completed an energy survey questionnaire which will now be turned over to an individual who will visit each school and evaluate each building from an energy conservation standpoint.

We are now working to establish a new budgeting process for the School Department. This is required by state law and will follow closely the present federal budgeting system. It is basically a bookkeeping change and will require us to recode all of our categories in the budget to comply with the new regulations. We have been attending meetings and working on this and hope to have it ready by January 1, 1980, which is the state law deadline.

Last Friday Mr. Gilman attended a meeting with Dr. DeForrest at the Strafford Learning Center and received the latest word on requirements on handicapped education and funding at both state and federal level. This was an informative meeting and will provide guidelines for us in our next year's plans.

Spaulding High School marching band placed second in two New England Competitions recently. The most recent one was last Sunday when they lost first place by two tenths of one point. Our drum section, however, took first place over all the bands in the New England Competition.

December

This month we conducted workshops in language arts and reading at the elementary level. The purpose of these was to reinforce the reading programs in each classroom. The administration at the elementary level also has set up a program on fire prevention with the assistance of Chief Duchesneau of the Fire Department.

There have been many committee meetings throughout the month in such areas as Staff Development, Handicapped Education, and Accountability. In addition, the Testing Committee, a subcommittee of the Accountability Committee, has started to develop an evaluation instrument that can be used to determine what we are doing in Grades 4, 8, and 11. When completed this instrument will assist us in our accountability process.

The Iowa Tests of Basic Skills have been received and our annual testing will take place during the month of January.

We have had two meetings this month with state people regarding the new budget process. As I have mentioned earlier, we are expected to use the new state budget form starting January, 1980. This is a considerable task because all accounts within the budget are somewhat different than our present ones. In addition, such programs as school lunch and student activities will now become part of the basic budget. The big problem is recoding all the thousands of items. This has been going on for some time now and will continue in the near future.

It is our aim in the Education Department to continue to reflect the needs of you, the people of the city. It is becoming more difficult, however, because the single most important eroding factor in education is inflation. I am fully aware that ways will have to be found to economize and restructure the education process to limit the amount of increase per year. In talking with the administrators, our long-range goal for 1980 is to find new ways or different ways to prepare your children for their adult life.

In closing, I continue to enjoy the role of educational leader in this city and to enjoy the challenge and feeling of accomplishment that I have.

Respectfully submitted,
THAYER D. WADE
Superintendent

ANNUAL REPORT FOR WELFARE DEPARTMENT 1979

TO THE HONORABLE MAYOR AND CITY COUNCIL OF THE
CITY OF ROCHESTER, NEW HAMPSHIRE:

The report for the welfare department for the year 1979 provided assistance for 198 families and 134 single individuals.

The appropriation for direct relief and soldier's aid was \$100,000.00 and vouchers were issued for the following categories:

Food	\$24,803.19
Fuel	11,276.63
Rent	37,614.14
Utilities	5,687.87
Medical	1,162.15
Clothing	255.65
Burials	245.00
Board & care-adults	<u>1,984.40</u>
TOTAL	\$83,029.03

A special appropriation for the Board & Care of Children was made during the year for \$24,000.00 and \$21,488.46 was expended.

Referrals were made during the year for the food stamp program-CAP program-CETA office-Unemployment service and to various towns and county welfare programs.

Appropriation for the Old Age Assistance program was \$55,000.00 and the expenditures for the year amounted to \$69,841.78.

Appropriation for the office expense was \$10,810.00 and the expenses amounted to \$11,213.36.

Credits received during the year amounted to \$4,221.53.

Respectfully submitted,
ALTHEA D. BERRY
Overseer of Welfare

CITY OF ROCHESTER, NEW HAMPSHIRE
Annual Financial Report
December 31, 1979
(Administration of Mayor John Shaw)

The Mayor and City Council
City of Rochester, New Hampshire

We have examined the financial statements of the City of Rochester, New Hampshire as of and for the year ended December 31, 1979 as listed under exhibits in the table of contents. Our examination was made in accordance with generally accepted auditing standards and, accordingly, included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

As described more fully in Note 12, the financial statements referred to above do not include financial statements of the General Fixed Asset Group of Accounts which should be included to conform with generally accepted accounting principles.

The accompanying financial statements contemplate continuation of the City as a going concern; however, as more fully described in Note 11 to the financial statements, the City's ability to continue as a going concern is dependent upon the generation of sufficient cash flow from operations or borrowing to finance current obligations.

In our opinion, subject to the possible effects of the matters discussed in the preceding paragraph and except that the omission of the financial statements of the General Fixed Asset Group of Accounts results in an incomplete presentation, the financial statements referred to above present fairly the financial position of the City of Rochester, New Hampshire at December 31, 1979 and the results of its operations and the changes in financial position of its proprietary fund types and similar trust funds for the year then ended, in conformity with generally accepted accounting principles applied on a basis consistent with that of the preceding year.

Our examination was made for the purpose of forming an opinion on the financial statements taken as a whole. The accompanying financial information listed as a schedule in the table of contents is presented for purposes of additional analysis and is not a required part of the financial statements of the City of Rochester, New Hampshire. The information has been subjected to the auditing procedures applied in the examination of the financial statements and, in our opinion, is stated fairly in all material respects in relation to the financial statements taken as a whole.

PEAT, MARWICK, MITCHELL & CO.

CITY OF ROCHESTER, NEW HAMPSHIRE

Notes to Financial Statements

December 31, 1979

1. Summary of Significant Accounting Policies

The accounting policies of the City of Rochester, New Hampshire conform to generally accepted accounting principles applicable to government units. The following is a summary of the more significant of such policies.

A. Basis of Presentation

The accounts of the City are organized on the basis of funds or account groups, each of which is considered to be a separate accounting entity. The operations of each fund are accounted for by providing a separate set of self-balancing accounts which comprise its assets, liabilities, reserves, fund balances, revenues and expenditures. The various funds are summarized by type in the financial statements. The following fund types and account group are used by the City.

Government Funds

General Fund—The general fund is the operating fund of the City. All general tax revenues and other receipts that are not allocated by law or contractual agreement to some other fund are accounted for in this fund. The fund pays the general operating expenses, the fixed charges and the capital improvement costs that are not paid through other funds.

Capital Projects Fund—The capital projects fund is utilized to account for all resources and project authorizations used in the acquisition and construction of capital facilities and other fixed assets.

Proprietary Fund

Enterprise Fund—The enterprise fund is used to account for operations of the Water Department which are financed and operated in a manner similar to private business enterprises—where the intent of the govern-

Proprietary Fund (cont.)

ing body is that the costs (expenses, including depreciation) of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user charges.

Fiduciary Fund

Trust Funds-These funds are used to account for assets held in trust by the City for others.

Account Group

General Long-term Debt-This account group is established to account for long-term debt which is backed by the City's full faith and credit.

B. Basis of Accounting

The modified accrual basis of accounting, under which expenditures, other than interest on long-term debt, are recorded when the liability is incurred and revenues are recorded when received in cash unless susceptible to accrual, i.e. measurable and available to finance the City's operations, or of a material amount and not received at the normal time of receipt, is followed by the governmental fund types.

Revenue sources which are being accrued include property taxes, charges for current services and intergovernment reimbursements. Major revenue sources not being accrued are automobile excise taxes, licenses and permits.

Budget data as presented for the general fund also utilizes the modified accrual basis of accounting. The accrual basis of accounting is utilized by proprietary fund types and fiduciary fund types.

C. Inventory

Inventory is valued at cost (first-in, first-out)

D. Property, Plant and Equipment--Water Fund

Property, plant and equipment owned by the water fund is stated at cost. Depreciation has been provided over the

D. Property, Plant and Equipment—Water Fund (cont.)

estimated useful lives of the assets using the straight-line method. The estimated useful lives are as follows:

Structures	50 years
House services	25- 50 years
Mains	75-100 years
Equipment	3- 25 years
Water tanks	100 years

2. Property Tax

Property taxes for the current year were levied October 28, 1979 on the assessed value listed as of the prior April 1 for all real property located in the City. Taxes were due December 1, 1979 with a 61-day grace period before interest was charged. The last revaluation occurred in 1964. The assessed value for the list of April 1, 1979, upon which the 1979-80 levy was based, was at approximately 34% of the estimated market value.

3. Debt Obligations

Long-term Debt

The following is a summary of debt transactions of the City for the year ended December 31, 1979:

	<u>General Obligation</u>	<u>Water fund</u>	<u>Total</u>
Debt payable at			
January 1, 1979	\$9,360,783	392,159	9,752,941
Debt retired	<u>924,256</u>	<u>51,408</u>	<u>975,663</u>
Debt payable at			
December 31, 1979	<u><u>\$8,436,527</u></u>	<u><u>340,751</u></u>	<u><u>8,777,278</u></u>

The City is subject to state law which limits debt outstanding to a percentage (depending on how funds will be used) of its last full state valuation. Debt incurred for state required sewerage systems and treatment facilities are not subject to the limit. The following is a summary, by purpose, of the outstanding debt of the City at December 31, 1979 and related limitations.

Long-term Debt (cont.)

	Net debt outstanding	Percent of state assessed value of \$291,967,166	Statutory limit	Debt margin
School	\$4,722,900	7.00%	\$20,437,701	15,714,801
Water	321,257	10.00	29,196,717	28,875,460
All				
other	1,696,463	1.75	5,109,425	3,412,962
	6,740,620			
Sewer	2,036,657			
Total	<u>\$8,777,277</u>			

The annual requirements to amortize all direct long-term debt outstanding, are as follows:

1980	\$1,639,227
1981	1,151,407
1982	1,022,059
1983	971,001
1984	812,529
1985-1989	3,344,151
Thereafter	5,580,421

Overlapping Debt

The City is situated in Strafford County and is, therefore, responsible for its proportionate share of the County's general obligation debt. As of December 31, 1979, the County's bonded indebtedness is \$4,300,000 of which 24.634% or \$1,059,262 is the City's proportionate share. The City's share of this debt is amortized through annual assessments by the County.

4. Pension Plan

The City participates in the New Hampshire retirement system which covers all full-time permanent City and school employees. The system requires that both employees and the City contribute to the plan and provides retirement, disability and death benefits. Employees are

4. Pension Plan (cont.)

eligible for normal retirement upon attaining age sixty and early retirement after reaching age fifty-five provided they have accumulated ten years of creditable service. The City's contribution for 1979 is \$132,274.

As of June 30, 1979, the unfunded accrued liability approximated \$16,866 and is being amortized over a remaining period of nine years.

5. Legal Violation

Chapter IV, section 9, of the City Ordinance forbids any appropriation to be overexpended until the City Council stipulates the means for financing the overexpenditure. Several of the City's appropriations were overexpended in 1979 without Council providing the means for financing the overexpenditures.

6. Prior Period Adjustment/Reclassification

General Fund:

Reclassification

In a prior year, \$30,000 was improperly classified as a general fund expenditure. In 1979, a transfer was made between the capital projects fund fund balance and the general fund fund balance to correct this error.

Capital Projects Fund:

Restatement

The method of accounting for grant revenues has been revised in 1979 to comply with Statement 2 which has been issued by the National Council on Governmental Accounting. The effect of the change, applied retroactively, was to increase the capital projects fund, fund balance by \$15,149 at the beginning of the period.

Water Fund:

Restatement

In 1979, it was determined that the proceeds of a note received from HUD in a prior period had been added to retained earnings instead of being recorded as a liability.

6. Prior Period Adjustment/Reclassification (cont.)

The beginning balance in water fund retained earnings has been restated by \$19,494 to properly record the note as a liability.

7. Property, Plant and Equipment

A summary of the water fund's property, plant and equipment follows:

	Balance January 1, 1978	Additions	Balance December 1979
Structures and land	\$ 104,908	-	104,908
House services	328,598	13,083	341,681
Mains	2,000,869	2,272	2,003,141
Equipment	612,101	2,893	614,994
	<u>3,046,476</u>	<u>18,248</u>	<u>3,064,724</u>
Less accumulated depreciation	<u>1,173,688</u>		<u>1,220,032</u>
	<u>\$1,872,788</u>		<u>1,844,692</u>

8. Trust Fund Investments

Trust fund investments are carried at cost. The market value of these investments at December 31, 1979 is \$277,732.

9. Due from Other Governmental Units

These amounts represent unclaimed portions of capital construction grants committed by various Federal and state agencies. The amount has been accrued to the extent that actual expenditures exceed reimbursement.

The grant programs are subject to financial and compliance audits by the grantors or their representatives. Audits of the programs have not been completed. Accordingly, the City's compliance with applicable requirements will be established at a future date.

10. Fund Balance Designated for Subsequent Years Expenditures-General Fund

The designated fund balance of the general fund consists of

10. Fund Balance Designated for Subsequent Years

Expenditures-General Fund (cont.)

the following:

School repairs and equipment	\$20,385
Pumping station	1,240
Copy machine	220
Computer	21,831
School humidifier and camera	1,379
Welfare-delinquent children	2,512
Fire alarm	9,499
Audit	19,500
Traffic lights	(146)
	<u>\$76,420</u>

11. Continuation as a Going Concern

The City is experiencing a liquidity problem and a deterioration of cash flow from operations as evidenced by an undesignated fund deficit in the General Fund of \$880,354.

Various options are being considered by the City to alleviate the liquidity problem including, but not limited to, the re-financing of certain debt obligations due in the next fiscal period and obtaining additional long-term financing.

12. General Fixed Assets

The City does not maintain a record of its general fixed assets as required by Generally Accepted Accounting Principles applicable to governmental units. Expenditures for property and equipment are charged against the departmental operations whenever such items are purchased.

13. Contingent Liabilities

There are several pending lawsuits in which the City is involved. The potential maximum exposure to the City is estimated to be \$185,000. Council will determine financing sources, if necessary, at a future date.

CITY OF ROCHESTER, NEW HAMPSHIRE
Management Letter
March 17, 1980
(Administration of Mayor John Shaw)

To the Mayor and City Council
City of Rochester, New Hampshire:

We have examined the financial statements of the City of Rochester, New Hampshire for the year ended December 31, 1979 and have issued our report thereon dated March 17, 1980.

As a part of our examination, we made a study and evaluation of the City's system of internal accounting control to the extent we considered necessary to evaluate the system as required by generally accepted auditing standards. Under these standards, the purpose of such evaluation is to establish a basis for reliance on the system of internal accounting control in determining the nature, timing and extent of other auditing procedures that are necessary for expressing an opinion on the financial statements and to assist us in planning and performing our examination of the financial statements.

Our examination of the financial statements made in accordance with generally accepted auditing standards, including the study and evaluation of the City's system of internal accounting control for the year ended December 31, 1979, that was made for the purposes set forth in the paragraph above, would not necessarily disclose all weaknesses in the system because it was based on selective tests of accounting records and related data. Such study and evaluation revealed the following conditions that we believe deserve your attention.

Significant Weaknesses

In our opinion, the following situations are significant weaknesses in the system of internal controls which should be acted upon as soon as possible.

Going Concern Problem

In the accountant's report issued with the City's financial statements for the year ended December 31, 1979, we noted

that the City's ability to continue as a going concern is dependent upon its ability to generate sufficient cash flow from operations to finance current operations. We would like to emphasize that this is a critical time for the City and that actions taken now will have a significant impact on the City's financial position for years to come. Thus, it is important that the Council, the Mayor, Staff and Citizens of Rochester work together to resolve the City's financial problems. Such an effort will demonstrate to the financial community that the City recognizes its problem and that it intends to correct them.

A summary of the more significant causes of the financial problems encountered by the City follows. Many of the points raised are elaborated upon in other sections of the letter.

1. Budgeting

Based upon a review of the results of operations as compared to budgeted amounts as well as a comparison of the 1979 budget to the 1978 results of operations, it appears that the budget was unrealistically low. The effect of such an underestimate is that the City does not generate sufficient funds through taxes to pay for the services rendered to its citizens. Thus, the City is forced to seek other financing sources which, of course, must ultimately be paid back through the tax levy. In effect, the City's current operations are financed with borrowings from future periods.

2. Financing

Improper financing can have a significant impact upon a community's liquidity as will be experienced by the City in future periods. Rochester's problems in this area can be summarized as follows:

- a. Financing capital expenditures over too short or long a period of time or with little or no annual principal payments.

Capital expenditures should be financed over the expected useful life of the asset purchased and amortized annually as the citizens of the community receive benefit from the asset.

Rochester is currently in the position that large sums of money are required to make large payments on maturing

debt which should have been financed and amortized over a longer period of time. In addition, the City is still making payments on debt for which assets are no longer in use.

b. Financing current operations with long-term debt.

The City had been warned by the state not to finance current operations with long-term debt, however, the practice continued. Due to the accounting treatment for long-term debt the effect of such a practice on the financial position of the City is not immediately apparent. The annual payments to amortize the debt begin to pyramid, however, and consume a larger portion of the City's budget as time passes. In effect, the City is being run with borrowed funds which must be paid back in the future. Citizens are taking advantage of services which they are not currently paying for.

Several alternatives are being considered by the City and its financial consultant. The alternatives fall into two basic categories:

1. Obtaining financing to eliminate the current liquidity problem and enabling the City to amortize the costs over future periods.
2. Raising sufficient taxes to eliminate the liquidity problem.

In developing an accurate budget for the coming period, taxes will have to be increased significantly should the citizens of Rochester decide to maintain the same level of services received in 1979. Thus, the second alternative might be out of the question due to the citizens' inability to accept the increased tax burden.

Thus, the City appears to be faced with obtaining financing to eliminate its financial problems. In order to obtain this financing, the City will be asked by the bank to provide them with its plans for eliminating and preventing financial difficulties in the future.

General Fund Deficit

The City ended 1979 with a significant deficit in the general fund. This deficit was due to expenditures exceeding appropriated

balances by a significant amount. In reviewing the various expense accounts, it appeared to us that the budgeted amounts in some categories was lower than might be expected. We noted that the budgeted amounts in some categories were lower than last year's actual expenditures within the category even though inflation could be expected to increase the costs and a reduction in services to make up the difference would not likely be possible. In addition, we noted that certain expenditures (such as pay raises) were not considered in formulating the budget but were charged to fund balance when granted. We believe that pay raises can be anticipated each year and that the City should be able to reasonably estimate and provide for raises in the budget. Obviously, there will always be unexpected expenditures arising during the year, thus we recommend that an adequate amount be appropriated to a contingency account to absorb such items.

The development of a reasonably accurate budget will ensure that the City is collecting adequate taxes to finance its current operations and will eliminate the requirement to borrow money to finance some of these expenditures. Borrowing funds to pay current operations will necessitate that taxpayers in future periods pay for services rendered by the City in the past. In effect, the tax rate during the year of service is unduly low and the citizens of the City are being provided services for which future taxpayers will be asked to pay.

Cash Flow

In developing the City's budget, cash flow must be considered. A balanced budget on the seeming availability of fund balance to finance expenditures does not mean that there will be adequate cash on hand to pay bills when they are due.

The City's cash position, both current and projected, has been significantly weakened during 1979. The main reasons for this weakening follow:

1. Excessive utilization of the undesignated fund balance both to reduce the tax commitment in the annual budget and to finance current operating expenses. It should be noted that the fund balance does not represent cash with which expenditures can be paid, but merely the excess of assets over liabilities. To the extent that fund balance is offset noncash assets, it cannot be used to finance expenditures. Such a use would result in inadequate cash on hand to pay bills.

2. Expenditures in 1979 were well in excess of revenues and fund balance, thus for a portion of the year, the City was deficit spending. During this period, liabilities were incurred which will affect the City's cash position in future periods.
3. The City's practice of funding current operations in 1979 and in prior years with debt will begin to have an impact on the City's cash position and tax rate in 1980 as banks hesitate to refinance such debt. In order to pay off notes falling due, the City will be forced to begin collecting from taxpayers for services rendered in prior years. In addition, the City will be forced to seek funds with which to pay accounts payable which accumulated during 1979.

Specific observations regarding the City's budgetary process are outlined later in this letter.

Cash Receipts

Cash receipts are not necessarily deposited daily. The daily deposit of cash receipts keeps the amount of cash on hand at a minimum and reduces the risk of loss from burglary. Moreover, there is less opportunity for misappropriation of funds for short periods of time and reduced flexibility in concealing such "borrowing" by substitution of later receipts. Investment income could also be maximized.

Purchasing

We would like to recommend the following regarding the purchasing system:

- . The City does not use a receiving report, nor is receipt of goods or services noted on invoice. In order to be assured that all invoices represent purchases for municipal purposes and that goods and services have been received, we recommend that a receiving report be used to record the receipt of all goods and services. Receiving reports should be attached to the vendor's invoice before it is approved for payment.
- . Upon approval by the purchasing committee, all copies of purchase orders are returned to the originating department. We

recommend that one copy of the purchase order be transmitted to the accounting department to be subsequently compared to the invoice. This procedure will ensure the propriety of the goods received or services rendered and that the amount charged is as agreed.

- . Invoices received in the mail are initially transmitted to the department heads. To establish control over the invoices and to maintain an adequate record of accounts payable, we recommend that all vendors' invoices be encumbered by the accounting department. This would additionally decrease the time involved in processing invoices and could enable the city to take advantage of purchase discounts lost because of the time lag involved.
- . Invoices should not be paid unless there is a purchase order approving the amount to be disbursed. This would provide assurance that disbursements are made for municipal purposes and that duplicate invoices are not being paid.

After disbursement checks are signed by the Mayor and Business Administrator, the checks are returned to the accounting department for mailing. We recommend that the checks be returned to an individual who is independent of the cash disbursement function for mailing to reduce the risk of misappropriation of funds.

Payroll Procedures

In connection with our examination of payroll procedures, we noted the following for your consideration:

- . Department heads approve payrolls, do the hiring, and distribute the paychecks for their respective departments. Such a system can result in a defalcation which can be covered up by the perpetrator. We recommend that the responsibilities of hiring and distributing the payroll be assigned to an employee who is independent of the various departments and the preparation of the payroll. Additionally, the payroll should be approved by a responsible official independent of the payroll function.

- . We recommend that pay rate history records be maintained for each employee which would indicate the approval of any rate changes by designated City officials. This procedure will add assurance that wages being paid are proper and in line with established policies.
- . The maintenance of personnel records is not centralized. We recommend the establishment of a centralized personnel record filing system to accumulate information on employees. In our opinion, such a system would help ensure that such information is not improperly disclosed and that the files are complete in all respects.
- . Although our test procedure did not indicate instances where taxes are being withheld at rates differing from those expected based on information in the W-4s, we continue to recommend that a formal policy be instituted for the City to require all employees to submit new W-4 forms annually and that no changes be made in the payroll system without revised W-4s.
- . The payroll bank account is not being reconciled monthly. We observed that reconciliations had not been prepared for at least ten months. We recommend that payroll bank statements be reconciled monthly by a person independent of the payroll function. By reconciling the bank statement to the book balance and resolving any differences immediately, it can be determined that all costs have been expensed and that the proper amount has been deposited. We also recommend that the payroll distributions report be reconciled to the payroll register on a weekly basis.

Subsidiary Ledgers

The City's accounting system includes many subsidiary ledgers and records that support the general ledger. Several of these were not in agreement with the general ledger at December 31, 1979. We recommend that the following subledgers/records be reconciled to the general ledger on a monthly basis to ensure the propriety of postings:

- . Accounts receivable listing for both the general and water funds - In the case of the water fund, individual ledger cards

should also be reconciled to the control cards. Both listings contain receivables which are five to ten years old. We recommend that these past-due receivables be consider for write-off against the reserve. By removing these accounts from the books, the monthly reconciliation would be facilitated.

- . Accounts payable listings for both the general and water funds - Particular attention should be paid to reconciling the interfund balances.
- . School accounts should be reconciled to records maintained by the Superintendent's office.
- . Water fund fixed asset records.

Overexpenditures

The City ordinance requires identification by the Council of additional financing sources before an appropriation can be overexpended. The City has exceeded appropriated amounts in numerous accounts. Where it appears likely that expenditures will exceed appropriated amounts, the Council should be requested to transfer appropriations from other accounts or to make additional appropriations from fund balances when financially feasible.

Self-insurance

The City has instituted a self-insurance program for medical insurance. The administrator of the program has agreed to send the City monthly statements summarizing monies deposited, benefits paid, and the balance in the bank account. We recommend that information contained in the monthly statement be reconciled monthly to information contained in City's books and to the benefits-paid forms. This would ensure that the administrator has been paying claims only for persons covered by the plan and that the administrator's records and City's records are in agreement.

Other Observations

In addition to the items above, which in our opinion require immediate attention, the following items are noted to highlight

areas which we believe should be reviewed and acted upon by the City in order to:

1. Increase revenues and improve cash flow.
2. Reduce expenditures.
3. Improve management information.
4. Protect assets.
5. Improve operating efficiency.
6. Avoid instances of noncompliance with statutes.

It should be noted that our recommendations are not the sole manner in which desired goals can be reached. It is up to the City to decide which means would be appropriate in achieving goals. Our recommendations are presented mainly to give City officials a starting point from which to proceed.

Increasing Revenues and Improving Cash Flow

Tax Commitment

The City currently bills taxes once a year. This results in significant uncollected taxes at year end. Since tax anticipation notes are due at year end, the City's cash position is strained to meet these obligations. We recommend that the City consider billing taxes in two equal installments during the year. In addition to improving the City's cash flow, the taxpayer should find budgeting for two smaller payments easier. Cash flow would be improved and investment income could be maximized. The semi-annual billing of taxes is now being considered by Council.

Interest on Delinquent Taxes

The City makes a limited effort to collect interest due on delinquent taxes when payment is received through the mail. Formal and effective guidelines should be established to ensure the collection of all interest due the City to maximize interest revenue and to establish impartiality as to when fines will be assessed.

The City is assessing 9% on delinquent taxes. We recommend that the City either lobby the state directly or apply pressure through the Tax Collector's Association to raise the allowable interest charged on delinquent taxes to reflect current economic conditions.

Assessing Property Additions

The City has not been assessing property additions on a timely basis. We noticed several building permits on property which had not been reappraised for as long as five years. We recommend that property additions be appraised as soon as possible to maximize revenues.

Yield Tax Bonds

Yield tax bonds are not set at an adequate amount to cover the City in case the lumber companies do not return to pay the lumber tax. We recommend that yield tax bonds be set at high amounts to discourage lumber companies from avoiding tax liabilities.

Exemptions on Taxes

Partial exemptions on taxes are granted to persons 65 and over. This exemption is based only on information contained in the application for exemption; no proof of birth date is required. Because requiring verification of birth date is prohibited by state law, there exists a possibility that unqualified persons are receiving credits. Thus, the burden of tax payments made by other taxpayers is increased. We recommend that the City attempt to change existing regulations to enable it to request proof of birth date from a taxpayer requesting a credit. In our opinion, any taxpayer willing to accept the credit will be willing to document eligibility for it.

Financing Capital Projects

The City has not properly financed capital projects in some instances. Because of this, notes often mature in a given year with no periodic payments made in other years. In addition, the term of the financing agreement is often too short considering the project being worked upon. This causes a strain on financial resources to meet the large payments due in one year. We recommend that capital projects be financed so that principal and interest payments are spread over a period approximating the useful life of the projects.

We understand that the City has procured the services of a financial advisor to help in making financial decisions.

Auto Permit Fees

The City has not been properly assessing excise taxes related to new model year cars. When a new car is registered prior to issuance of the automobile registration book, valuations are obtained by contacting respective automobile dealers. We noted several instances where the valuation contained in the automobile registration book was greater than the valuation assessed to the car owner. We recommend that a list be maintained of car owners whose automobile valuation was not based on the valuation given in the automobile registration book. When the book is received, these car owners should be assessed additional taxes or given a rebate for overassessments as appropriate. Additional assessments not paid by taxpayers might be collected the following year when the individual attempts to register the vehicle.

Budgeting Procedures

We observed the following weaknesses in the formulation of the budget and in the appropriation and recording of expenditures:

- . In areas involving fixed costs, we observed several instances where budgets were lower than the prior year's actual.
- . Certain expenditures such as pay raises, were not estimated and included in the budget.
- . Some budgetary items were not recorded correctly in the budget. We noted that the amount to be paid on retiring a note had a zero dropped when recorded in the budget schedule. Thus, debt retirement was underbudgeted.

We recommend that all department and fixed cost budgets be reviewed by someone independent of the departments for reasonableness. Budget amounts should be compared to prior year expenditures and revenues to determine the reasonableness of amounts budgeted. An amount should be included in the budget to fund anticipated pay increases.

- . The City budgets certain fixed costs and noncontrollable costs in the various departmental budgets. We recommend that only those costs which are controllable at the department level be allocated to that department. Costs such as debt retirement

and interest, social security and retirement, and workmen's compensation should be appropriated as general administrative expenditures. This would provide a more meaningful budget for department heads as they would be held accountable only for costs which they control. In addition, book-keeping would be simplified since expenditures would not have to be allocated to the various departments. School expenditures should continue to be allocated to that department.

- . The City appropriated a substantial amount from fund balance as well as charging current expenditures to fund balance. We recommend that the practice of charging expenditures to fund balance be discontinued and that fund balance be appropriated only when it is sufficient to ensure that adequate cash is available to finance the expenditures. Current expenditures should be charged against the appropriations or special appropriations to which they relate.
- . The Council appropriated money for expenditures but did not specify how the expenditures would be financed. Since specification of the funding source is required in the City charter and since the procedure is fiscally an appropriate one, we recommend that the provision be followed.
- . The overlay for the past few years has been set at a rate considerably lower than the balance of taxes abated during the period. State law allows an overlay for up to five percent of the tax commitment. We recommend that overlay be increased to provide for potentially uncollectable taxes or that an amount be appropriated which would realistically estimate anticipated abatements.

Trust Fund Income

The trust fund trustees should periodically review the trust fund portfolio to be certain that the return on investments is maximized. We noted that a significant amount of money is being retained in the income investment account. This balance should be invested in higher yield securities when possible.

Water Fund Revenues

The following opportunities to increase water fund revenues or

improve cash flow are offered for your consideration:

- . Our review revealed that a substantial portion of the water fund's accounts receivable were long overdue. In fact, several accounts were identified as not having any payments made for several years. We found the City's collection procedures in this area to be minimal. We recommend that the City develop formal guidelines for effective collection of water bills which might include liening the property services. Such guidelines will improve cash flow, reduce receivable carrying costs, and will demonstrate that the City intends to collect all bills.
- . Billing rates should be reviewed periodically to determine whether the fee structure is sufficient to cover costs and capital needs.
- . We noted instances where bills are being sent out two to three months after the billing date. We recommend that bills be sent out as soon after the billing date as possible to improve cash flow and increase investment potential or minimize the need to borrow.
- . There are several water customers who are assessed a flat fee. Considering that many of these fees were established several years ago, the City should investigate the feasibility of installing water meters on these properties. If this is not practical, fees should be reviewed to determine whether they are adequate in light of expected consumption at the properties.
- . The City estimates billings when access cannot be gained to meters. To ensure that the proper fee is being charged, we recommend that the period for which a customer's bill can be estimated be limited to one year, with a reading required after this period.
- . The City has not been replacing faulty meters with the recently acquired meters on a timely basis. Replacing the faulty meters would increase water fund revenues and decrease carrying costs of inventory.
- . It was noted that interest assessed on delinquent water accounts receivable is sometimes written off before any collection procedures are applied. Once again, to ensure impartiality

in assessing the fine, we recommend establishing formal guidelines for effective collection of the interest charge. Such a procedure should also accelerate collection of accounts receivable.

Reducing Expenses

Obsolete Water Fund Inventory

The City should identify and dispose of its obsolete water fund inventory. Benefits will include reducing the carrying costs of the inventory and a generation of miscellaneous revenues to be used by the fund to update its inventory.

Improving Management Information

Monthly Reports of Financial Operations

The City prepares monthly statements of budgeted expenditures on a cash basis. Because monthly reporting of financial operations provides management with the information necessary to assess actual performance in relation to planned operations and to take corrective action on a timely basis, care should be taken in compiling information for the statement.

Accounts receivable and accounts payable should be accrued as appropriate. The monthly report should include year-to-date revenues, expenditures and encumbrances with comparisons to budget and should be issued to the Mayor, Council, department and program heads.

Water Fund Inventory Valuation

We would like to note the following as regards the water fund inventory:

- . To properly reflect income from one period to the next, it is essential to consistently value inventory on the same basis.
- . Physical inventory counts should be performed at year end to identify quantities on hand at the close of the accounting period to ensure that all inventories are accounted for and to ensure that obsolete items are not valued.

Costing of Fixed Asset Additions—Water Fund

A majority of the fixed asset additions in the water fund require the costing of labor and services performed. It appears that the cost of these items is being underestimated. We recommend the City undertake an analysis of the various services performed to determine proper costing rates. In doing so, special attention should be paid to properly identifying indirect costs such as the cost of machinery and equipment used, costs of operating the equipment and employee benefits paid for laborers which would not be included in the pay rate.

Protection of Assets

Fixed Asset Record and Controls

Sound financial administration in safeguarding the City's investment in fixed assets is of utmost importance in the exercise of stewardship responsibilities. These responsibilities can be effectively discharged only through adequate fixed assets accounting.

By maintaining fixed assets records, the City's will realize several benefits:

- . Fixed assets can be inventoried periodically to ensure that they are properly controlled.
- . Responsibility for custody and effective use of fixed assets can be clearly established.
- . Records will be readily available to substantiate the amount of grants used to finance expenditures for fixed assets. Furthermore, the determination of costs for building or equipment use is facilitated. The latter is important to obtain reimbursement for the use of buildings and equipment in Federal and state aid programs.
- . Information is readily available both to determine insurance needs and to substantiate losses recoverable from insurance.
- . Information is available for the preparation of a Statement of General Fixed Assets.

Establishing fixed assets records when none existed before can be a difficult and time consuming task. One approach is to:

1. Define clearly what constitutes the fixed assets categories (e.g., land, buildings, improvements other than buildings, equipment); a fixed asset (i.e., minimum dollar value and useful life); and the location "control" areas.
2. Plan and perform a complete inventory of all fixed assets. In creating the inventory records, obtain as much of the information to be included in the individual assets records as is possible, e.g., asset description, location, vendor or manufacturer, acquisition date. Fixed assets identification tags should be affixed at the time the physical inventory is taken.
3. Assign values to each fixed asset according to accepted principles. More specifically, the AICPA Industry Audit Guide, "Audits of State and Local Governmental Units", sets forth the basis for valuing fixed assets of a governmental unit: "Such assets should be recorded at historical cost, or estimated historical cost, if the original cost is not available, or, in the case of gifts or contributions, at the fair market value at the time received."

Several procedures can be used to determine the valuation.

- . Reference to the historical records, such as vendors' invoices, contracts, purchase orders, capital expenditure authorizations, cancelled checks, gift acknowledgements, or other documents on hand.
- . Correspondence with vendors, donors, etc.
- . Use of an asset valuation reasonably reflective of historical value, provided it is reliable, if historical or fair market value is not available.
- . Historical cost as reasonably estimated by employees for small items of relatively low value, e.g., tools, office furniture, and equipment.
- . Reliance on independent outside appraisals for assets which

cannot be valued by one of the above methods or some other reasonable method. It is important to emphasize, however, that the appraisal should be based upon estimated historical cost, not on replacement cost or some other basis.

Evaluation of fixed assets in the above manner will enable the City to establish reasonably accurate initial fixed asset values.

Once initial records are established, the City will want to concurrently implement the kinds of controls and procedures enabling it to maintain control over the fixed assets. These procedures should include:

- . Control over the proper input into the records for all fixed asset additions, sales, abandonments and transfers.
- . Periodic reconciliation of detail ledgers to the general ledger.
- . Periodic inventory of fixed assets by location.
- . Verification that any asset traded in for a new acquisition is properly removed from the records.

Controls Over Data Processing Area

Access to hardware is not restricted during daytime. We recommend that access to data processing facilities be restricted to authorized persons in order to adequately protect the hardware programs and files.

Disks are not being properly safeguarded at night. Although the disks are being placed in a fireproof safe, we observed on several occasions that the safe was not being locked at night. We recommend that disks be adequately safeguarded in order to protect information contained on them.

Improving Operations

Accounting Procedures Manual

The City should consider developing an accounting procedures manual. Such a manual can be used to set forth job descriptions and lines of authority and supervision for all departments as well

as report formats, account codes and descriptions, and similar descriptive materials. The benefits of the manual include providing documentation in one location on the entire financial operations of the government, thereby facilitating an understanding of those operations by all members of management and providing detailed guidance to all personnel involved in financial activities. The training of new personnel would also be facilitated.

Bank Reconciliations

Miscellaneous bank reconciling items are accumulated throughout the year and are adjusted at year end. To reduce the time involved in preparing the monthly bank reconciliations, we recommend that reconciling items be adjusted for when they are identified.

Personnel

The City should investigate the feasibility of hiring a personnel director whose responsibilities would include hiring, maintaining complete and current personnel records and negotiating Union contracts. The benefits to the City would include providing professional expertise in hiring and negotiating contracts and would eliminate duplicate efforts by the various departments.

Water Fund Accounts

The water fund currently has its own set of books which are separate from the City's. Time could be saved if water fund transactions were recorded in the City's books in designated water fund accounts. In addition, the water fund bank accounts could be combined with the City's bank accounts. This would reduce the number of reconciliations to be performed and would maximize investment opportunities.

Payroll

The time spent in payroll preparation could be reduced by placing the payroll on a biweekly basis. This would free employees to work in other areas and would reduce operating costs.

Compliance with Statutes

Expense Allowances

It is the City's practice to charge Mayor and Council expense items to fund balance (revenue surplus). Since these are normal and recurring expenses, an annual appropriation should be made and the actual expense recorded in the appropriation ledger.

Prior Year Comments

Since the issuance of our management letter based upon our findings during the examination of the City's financial statements for the year ended December 31, 1978, our comments have been discussed and the following actions taken which we believe will improve the City's fiscal condition.

1. The City is making an attempt to collect all funds owed to it and to improve collection procedures to prevent accounts from remaining past due for extended periods of time.
2. The City has changed to a June 30 fiscal year and will begin collecting taxes semiannually. Thus, cash flow should be improved.

* * * * *

The objective of internal accounting control is to provide reasonable, but not absolute, assurance as to the safeguarding of assets against loss from unauthorized use or disposition and the reliability of financial records for preparing financial statements and maintaining accountability assets. The concept of reasonable assurance recognizes that the cost of a system of internal accounting control should not exceed the benefits derived and also recognizes that the evaluation of these factors necessarily requires estimates and judgments by management.

There are inherent limitations that should be recognized in considering the potential effectiveness of any system of internal accounting control. In the performance of most control procedures, errors can result from misunderstanding of instructions, mistakes of judgment, carelessness, or other personal factors.

Control procedures whose effectiveness depends upon segregation of duties can be circumvented by collusion. Similarly, control procedures can be circumvented intentionally by management with respect to the execution and recording of transactions or with respect to the estimates and judgments required in the preparation of financial statements. Further, projection of any evaluation of internal accounting control to future periods is subject to the risk that the procedures may become inadequate because of changes in conditions, and that the degree of compliance with the procedures may deteriorate.

The foregoing conditions were considered in determining the nature, timing and extent of audit tests to be applied in our examination of the financial statements, and this report of such conditions does not modify our report dated March 17, 1980 on such financial statements.

It should be noted that this letter, by its nature, is critical in that it contains only our comments and recommendations on deficiencies observed in the course of our examination. It does not include our observations on any strong features of the City's system of internal control that were observed.

* * * * *

We wish to take this opportunity to express our appreciation for the courtesy and cooperation extended to us by the officials and employees of the City during the course of our examination.

Very truly yours,
PEAT, MARWICK, MITCHELL & CO.
